CONTENTS

Vol. II, Nos. 1–6, 1947

Journal of Polymer Science

NUMBER 1, FEBRUARY

Photolysis of Rubber
L. BATEMAN 1

Refractometric Determination of Second-Order Transition in Polyvinyl Acetate
RICHARD H. WILEY 10

Polyelectrolytes. I. Picrates of 4-Vinylpyridine-Styrene Copolymers
RAYMOND M. FUOSS AND GEORGE I. CATHERS 12

Effect of Silver Salts on Emulsion Polymerization Systems Containing Butadiene
L. W. RAINARD 16

Intrinsic Viscosities and Molecular Weights of Polyvinyl Acetates
R. H. WAGNER 21

Chain Structure of Vinyl and Diene Polymers in Relation to Polymerization Mechanism
PAUL J. FLORY 36

Mercaptans as Promoters and Modifiers in Emulsion Copolymerization of Butadiene and Styrene Using Potassium Persulfate as Catalyst. I. Mercaptans as Promoters
I. M. KOLTHOFF AND W. E. HARRIS 41

Mercaptans as Promoters and Modifiers in Emulsion Copolymerization of Butadiene and Styrene Using Potassium Persulfate as Catalyst. II. Mercaptans as Modifiers
I. M. KOLTHOFF AND W. E. HARRIS 49

Mercaptans as Promoters and Modifiers in Emulsion Copolymerization of Butadiene and Styrene Using Potassium Persulfate as Catalyst. III. Calculation of Molecular Weights and Intrinsic Viscosities of Polymers from Mercaptan Consumption Data
W. E. HARRIS AND I. M. KOLTHOFF 72

Mercaptans as Promoters and Modifiers in Emulsion Copolymerization of Butadiene and Styrene Using Potassium Persulfate as Catalyst. IV. Definition and Calculation of Modifier Efficiency
W. E. HARRIS AND I. M. KOLTHOFF 82

Phase Separation in Polymer Solution
A. DOBRY AND F. BOYER-KAWENOKI 90

Relative Reactivities in Vinyl Copolymerization
TURNER ALFREY, JR., AND CHARLES C. PRICE 101

Photochemistry of Proteins. I (letter-to-editor), A. D. McLAREN 107

Reviews 109

Polymer News 111

VOLUME CONTENTS

NUMBER 2, APRIL

Symposium on Plasticizers 113–198

Introduction
E. F. IZARD 113

Survey of Plasticizers for Vinyl Resins
M. C. REED 115

Application of a Mechanistic Theory of Solvent Action to Plasticizers and Plasticization
ARTHUR K. DOOLITTLE 121

Internal Plasticization: The Effect of Chemical Structure
V. L. SIMRIL 142

Effect of Plasticizers on Second-Order Transition Points of High Polymers
R. F. BOYER AND R. S. SPENCER 157

Creep Behavior of Plasticized Vinylite VYNW
WILLIAM AIKEN, TURNER ALFREY, JR., ARTHUR JANSSEN, AND HERMANN MARK 178

Use of Perbenzoic Acid in Analysis of Unsaturated Compounds. I. Preparation and Stability of Solutions of Perbenzoic Acid.
I. M. KOLTHOFF, THOMAS S. LEE, AND MARY ANNE MAIRS 199

Use of Perbenzoic Acid in Analysis of Unsaturated Compounds. II. Determination of External Double Bonds in Synthetic Rubbers
I. M. KOLTHOFF AND THOMAS S. LEE 206

Use of Perbenzoic Acid in Analysis of Unsaturated Compounds. III. Results of Determinations of External Double Bonds in Synthetic Rubbers
I. M. KOLTHOFF, THOMAS S. LEE, AND MARY ANNE MAIRS 220

Copolymerization. I. Kinetics and Some Experimental Considerations of a General Theory
H. W. MELVILLE, B. NOBLE, AND W. F. WATSON 229

Polyisoprenes: A Theory of the Formation of Terpenes and Related Compounds
ARTHUR V. TOBOLSKY, LUIS CASTRO, SIDNEY J. STEIN, AND ALEX SACHER 246

Reviews 255

NUMBER 3, JUNE

Kinetic Treatment of Emulsion Polymerization
M. L. CORRIN 257

Heat Conduction and Molecular Structure in Rubberlike Polymers
JOHN REHNER, JR. 263

Reaction of Tetrachlorophthalic Anhydride with Cellulose Derivatives
WILLIAM P. UTERMOHLEN, JR., AND E. LOUISE WALLACE 275

Advances in Pectin Chemistry. Part I
RUDOLPH SPEISER 281

VOLUME CONTENTS

Effect of Centrifugal Field on Resistance to Motion of Threadlike Molecules in Solution
SEYMOUR J. SINGER 290

A Magnetic Rotation Study of Polymerization of Sytrene
PAUL A. GIGUÈRE 296

Diffusion of Water into a Polymer
J. F. H. CUSTERS 301

Polymeric Amides from Diamines and Dibasic Acids
D. D. COFFMAN, G. J. BERCHET, W. R. PETERSON, AND E. W. SPANAGEL 306

Anisotropic Diffusion of Direct Dyes in Fibers
A. FREY-WYSSLING 314

X-Ray and Moisture Equilibrium Investigation of Sodium Pectate
K. J. PALMER, T. M. SHAW, AND M. BALLANTYNE 318

Recent Ultracentrifugal Investigations on Cellulose and Cellulose Derivatives
INGVAR JULLANDER 329

Rapid Method for Sampling Latices in Bottle Polymerizations in Which Positive Gage Pressure Is Maintained in Bottle by a Monomer
D. E. WILLIAMS AND W. F. JOHNSON 346

Reviews 349

NUMBER 4, AUGUST

Influence of Structure on Polymer-Liquid Interaction. I. Relative and Absolute Values of Swelling Equilibria
G. SALOMON AND G. J. VAN AMERONGEN 355

Diffusion of Water Vapor through High Polymeric Membranes
A. E. KORVEZEE AND E. A. J. MOL 371

Solubility, Diffusion, and Permeation of Gases in Gutta-percha
G. J. VAN AMERONGEN 381

Heats of Polymerization of Acrylic Acid and Derivatives
ALWYN G. EVANS AND E. TYRRALL 387

Course of Acetylation and Deacetylation Reactions of Cellulose Fibers. I. Optical and Swelling Properties
D. VERMAAS AND P. H. HERMANS 397

Course of Acetylation and Deacetylation Reactions of Cellulose Fibers. II. X-Ray Diagrams
D. VERMAAS, P. H. HERMANS, AND A. WEIDINGER 406

Multi-ingredient Polyamides
W. E. CATLIN, E. P. CZERWIN, AND R. H. WILEY 412

Heats of Combustion and Solution of Liquid Styrene and Solid Polystyrene and Heat of Polymerization of Styrene
DONALD E. ROBERTS, WILLIAM W. WALTON, AND RALPH S. JESSUP 420

Potentiometric Titrations of Polymethacrylic Acid
AHARON KATCHALSKY AND PNINA SPITNIK 432

Photochemistry of Proteins. II (letter-to-editor), A. D. McLAREN 447

Reviews 449

VOLUME CONTENTS

NUMBER 5, OCTOBER

Tensile Strengths of Pure Gum Natural Rubber Compounds
GEOFFREY GEE 451

Some Structural and Chemical Aspects of Aging and Degradation of Vinyl and Diene Polymers
ROBERT B. MESROBIAN AND ARTHUR V. TOBOLSKY 463

Diffusion of Water Vapor through High Polymeric Membranes (errata, article in *J. Polymer Sci.*, **2**, 371–380, 1947)
A. E. KORVEZEE AND E. A. J. MOL 487

Potentiometric Titrations of Polymethacrylic Acid (errata, article in *J. Polymer Sci.*, **2**, 432–446, 1947)
AHARON KATCHALSKY AND PNINA SPITNIK 487

Emulsion Polymerization at High Temperature
NORMAN RABJOHN, R. J. DEARBORN, W. E. BLACKBURN, G. E. INSKEEP, H. R. SNYDER, AND C. S. MARVEL 488

Intrinsic Viscosity–Molecular Weight Relationship for Polystyrene
A. I. GOLDBERG, W. P. HOHENSTEIN, AND H. MARK 503

Products of Initiation, Retardation, and Inhibition of Peroxide-Induced Polymerization of Styrene
SAUL G. COHEN 511

Preparation and Properties of Rubberlike High Polymers. IV. Correlation between Structure and Properties of Elastomers Derived from Dienes
G. SALOMON AND C. KONINGSBERGER 522

Reactivity Ratios in Diene and Diene–Vinyl Copolymerization (letter-to-editor), L. A. WALL 542

Reviews 544

NUMBER 6, DECEMBER

Polythene Fine Structure
W. M. D. BRYANT 547

Molecular Structure of Cellulose and Starch
EUGENE PACSU 565

Atomic Configuration of Cellulose
A. J. A. VAN DER WYK AND K. H. MEYER 583

Behavior of Concentrated Polymer Solutions under Periodic Stresses
JOHN D. FERRY, W. M. SAWYER, AND J. N. ASHWORTH 593

Determination of Intrinsic Viscosity of Linear Polymers in Concentrated Solution
R. GOVAERTS AND G. SMETS 612

Precipitating Power as a Function of Molecular Weight
A. DOBRY 623

Steric Hindrance in Macromolecular Solutions
J. DUCLAUX 626

Deformation Mechanism of Cellulose Gels. III. Changes in Orientation upon Drying
P. H. HERMANS, J. J. HERMANS, D. VERMAAS, AND A. WEIDINGER 632

Ethanol–Toluene–Water as a Solvent Mixture for the Extraction of Nonpolymer from GR-S
I. M. KOLTHOFF, C. W. CARR, AND BETTY J. CARR 637

Subject Index

Analytical Techniques, Chemical

Ethanol–Toluene–Water as a Solvent Mixture for the Extraction of Nonpolymer from GR-S, I. M. Kolthoff, C. W. Carr, and Betty J. Carr, 637

Molecular Structure of Cellulose and Starch, Eugene Pacsu, 565

Polythene Fine Structure, W. M. D. Bryant, 547

Products of Initiation, Retardation, and Inhibition of Peroxide-Induced Polymerization of Styrene, Saul G. Cohen, 511

Some Structural and Chemical Aspects of Aging and Degradation of Vinyl and Diene Polymers, Robert B. Mesrobian and Arthur V. Tobolsky, 463

Use of Perbenzoic Acid in Analysis of Unsaturated Compounds. I. Preparation and Stability of Solutions of Perbenzoic Acid, I. M. Kolthoff, T. S. Lee, and M. A. Mairs, 199

Use of Perbenzoic Acid in Analysis of Unsaturated Compounds. II. Determination of External Double Bonds in Synthetic Rubbers, I. M. Kolthoff and T. S. Lee, 206

Use of Perbenzoic Acid and Analysis of Unsaturated Compounds. III. Results of Determinations of External Double Bonds in Synthetic Rubbers, I. M. Kolthoff, T. S. Lee, and M. A. Mairs, 220

Analytical Techniques, Physical

A Magnetic Rotation Study of Polymerization of Styrene, P. A. Giguère, 296

Course of Acetylation and Deactylation Reactions of Cellulose Fibers. I. Optical and Swelling Properties, D. Vermaas and P. H. Hermans, 397

Course of Acetylation and Deactylation Reactions of Cellulose Fibers. II. X-Ray Diagrams, D. Vermaas, P. H. Hermans, and A. Weidinger, 406

Diffusion of Water into a Polymer, J. F. H. Custers, 301

Polythene Fine Structure, W. M. D. Bryant, 547

Products of Initiation, Retardation, and Inhibition of Peroxide-Induced Polymerization of Styrene, Saul G. Cohen, 511

Rapid Method for Sampling Latices in Bottle Polymerizations in Which Positive Gage Pressure is Maintained in Bottle by a Monomer, D. E. Williams and W. F. Johnson, 346

X-Ray and Moisture Equilibrium Investigation of Sodium Pectate, K. J. Palmer, T. M. Shaw, and M. Ballantyne, 318

Cellulose and Cellulose Derivatives

Anisotropic Diffusion of Direct Dyes in Fibers, A. Frey-Wyssling, 314

Application of a Mechanistic Theory of Solvent Action to Plasticizers and Plasticization, A. K. Doolittle, 121

Atomic Configuration of Cellulose, A. J. A. van der Wyk and K. H. Meyer, 583

Course of Acetylation and Deacetylation Reactions of Cellulose Fibers. I. Optical and Swelling Properties, D. Vermaas and P. H. Hermans, 397

Course of Acetylation and Deacetylation Reactions of Cellulose Fibers. II. X-Ray Diagrams, D. Vermaas, P. H. Hermans, and A. Weidinger, 406

Deformation Mechanism of Cellulose Gels. III. Changes in Orientation upon Drying, P. H. Hermans, J. J. Hermans, D. Vermaas, and A. Weidinger, 632

Molecular Structure of Cellulose and Starch, Eugene Pacsu, 565

Reaction of Tetrachlorophthalic Anhydride with Cellulose Derivatives, W. P. Utermohlen, Jr., and E. L. Wallace, 275

Copolymerization and Copolymers

Copolymerization. I. Kinetics and Some Experimental Considerations of a General Theory, H. W. Melville, B. Noble, and W. F. Watson, 229

Mercaptans as Promotors and Modifiers in Emulsion Copolymerization of Butadiene and Styrene Using Potassium Persulfate as Catalyst. I. Mercaptans as Promoters, I. M. Kolthoff and W. E. Harris, 41

Mercaptans as Promoters and Modifiers in Emulsion Copolymerization of Butadiene and Styrene Using Potassium Persulfate as Catalyst. II. Mercaptans as Modifiers, I. M. Kolthoff and W. E. Harris, 49

Mercaptans as Promoters and Modifiers in Emulsion Copolymerization of Butadiene and Styrene Using Potassium Persulfate as Catalyst. IV. Definition and Calculation of Modifier Efficiency, W. E. Harris and I. M. Kolthoff, 82

Multi-ingredient Polyamides, W. E. Catlin, E. P. Czerwin, and R. H. Wiley, 412

Reactivity Ratios in Diene and Diene-Vinyl

Copolymerization, *Letter to the Editors*, Leo A. Wall, 542
Relative Reactivities in Vinyl Copolymerization, T. Alfrey, Jr., and C. C. Price, 101

Degradation

Photochemistry of Proteins. I. *Letter to the Editors*, A. D. McLaren, 107
Photolysis of Rubber, L. Bateman, 1
Polyisoprenes: A Theory of the Formation of Terpenes and Related Compounds, Arthur V. Tobolsky, L. Castro, S. J. Stein, and A. Sacher, 246
Some Structural and Chemical Aspects of Aging and Degradation of Vinyl and Diene Polymers, Robert B. Mesrobian and Arthur V. Tobolsky, 463

Emulsion Polymerization

Effect of Silver Salts on Emulsion Polymerization Systems Containing Butadiene, L. W. Rainard, 16
Emulsion Polymerization at High Temperature, Norman Rabjohn, R. J. Dearborn, W. E. Blackburn, G. E. Inskeep, H. R. Snyder, and C. S. Marvel, 488
Kinetic Treatment of Emulsion Polymerization, M. L. Corrin, 257
Mercaptans as Promoters and Modifiers in Emulsion Copolymerization of Butadiene and Styrene Using Potassium Persulfate as Catalyst. I. Mercaptans as Promoters, I. M. Kolthoff and W. E. Harris, 41
Mercaptans as Promoters and Modifiers in Emulsion Copolymerization of Butadiene and Styrene Using Potassium Persulfate as Catalyst. II. Mercaptans as Modifiers, I. M. Kolthoff and W. E. Harris, 49
Mercaptans as Promoters and Modifiers in Emulsion Copolymerization of Butadiene and Styrene Using Potassium Persulfate as Catalyst. III. Calculation of Molecular Weights and Intrinsic Viscosities of Polymers from Mercaptan Consumption Data, W. E. Harris and I. M. Kolthoff, 72
Mercaptans as Promoters and Modifiers in Emulsion Copolymerization of Butadiene and Styrene Using Potassium Persulfate as Catalyst. IV. Definition and Calculation of Modifier Efficiency, W. E. Harris and I. M. Kolthoff, 82

Fibers

Anisotropic Diffusion of Direct Dyes in Fibers, A. Frey-Wyssling, 314
Polymeric Amides from Diamines and Dibasic Acids, D. D. Coffman, G. J. Berchet, W. R. Peterson, and E. W. Spanagel, 306

Ionizable Polymers

Advances in Pectin Chemistry. Part I, R. Speiser, 281
Polyelectrolytes. I. Picrates of 4-Vinylpyridine-Styrene Copolymers, R. M. Fuoss and G. I. Cathers, 12
Potentiometric Titrations of Polymethacrylic Acid, A. Katchalsky and P. Spitnik, 432. *Errata*, 487

Mechanical Properties

Behavior of Concentrated Polymer Solutions under Periodic Stresses, John D. Ferry, W. M. Sawyer, and J. N. Ashworth, 593
Creep Behavior of Plasticized Vinylite VYNW, W. Aiken, T. Alfrey, Jr., A. Janssen, and H. Mark, 178
Deformation Mechanism of Cellulose Gels. III. Changes in Orientation upon Drying, P. H. Hermans, J. J. Hermans, D. Vermaas, and A. Weidinger, 632
Effect of Plasticizers on Second-Order Transition Points of High Polymers, R. F. Boyer and R. S. Spencer, 157
Emulsion Polymerization at High Temperature, Norman Rabjohn, R. J. Dearborn, W. E. Blackburn, G. E. Inskeep, H. R. Snyder, and C. S. Marvel, 488
Internal Plasticization: The Effect of Chemical Structure, V. L. Simril, 142
Preparation and Properties of Rubberlike High Polymers. IV. Correlation between Structure and Properties of Elastomers Derived from Dienes, G. Salomon and C. Koningsberger, 522
Refractometric Determination of Second-Order Transition in Polyvinyl Acetate, R. H. Wiley, 10
Some Structural and Chemical Aspects of Aging and Degradation of Vinyl and Diene Polymers, Robert B. Mesrobian and Arthur V. Tobolsky, 463
Survey of Plasticizers for Vinyl Resins, M. C. Reed, 115
Tensile Strengths of Pure Gum Natural Rubber Compounds, G. Gee, 451

Molecular Structure and Shape

Advances in Pectin Chemistry. Part I. R. Speiser, 281
Atomic Configuration of Cellulose, A. J. A. van der Wyk and K. H. Meyer, 583
Chain Structure of Vinyl and Diene Polymers in Relation to Polymerization Mechanism, P. J. Flory, 36
Heat Conduction and Molecular Structure in Rubberlike Polymers, J. Rehner, Jr., 263
Heats of Combustion and Solution of Liquid

Styrene and Solid Polystyrene and Heat of Polymerization of Styrene, D. E. Roberts, W. W. Walton, and R. S. Jessup, 420
Heats of Polymerization of Acrylic Acid and Derivatives, A. G. Evans and E. Tyrrall, 387
Internal Plasticization: The Effect of Chemical Structure, V. L. Simril, 142
Molecular Structure of Cellulose and Starch, Eugene Pacsu, 565
Multi-ingredient Polyamides, W. E. Catlin, E. P. Czerwin, and R. H. Wiley, 412
Polythene Fine Structure, W. M. D. Bryant, 547
Preparation and Properties of Rubberlike High Polymers. IV. Correlation between Structure and Properties of Elastomers Derived from Dienes, G. Salomon and C. Koningsberger, 522
Recent Ultracentrifugal Investigations on Cellulose and Cellulose Derivatives, I. Jullander, 329
Some Structural and Chemical Aspects of Aging and Degradation of Vinyl and Diene Polymers, R. B. Mesrobian and A. V. Tobolsky, 463
Steric Hindrance in Macromolecular Solutions, J. Duclaux, 626
X-Ray and Moisture Equilibrium Investigation of Sodium Pectate, K. J. Palmer, T. M. Shaw, and M. Ballantyne, 318

Molecular Weights

Intrinsic Viscosities and Molecular Weights of Polyvinyl Acetates, R. H. Wagner, 21
Intrinsic Viscosity–Molecular Weight Relationship for Polystyrene, A. I. Goldberg, W. P. Hohenstein, and H. Mark, 503
Mercaptans as Promoters and Modifiers in Emulsion Copolymerization of Butadiene and Styrene Using Potassium Persulfate as Catalyst. I. Mercaptans as Promoters, I. M. Kolthoff and W. E. Harris, 41
Mercaptans as Promoters and Modifiers in Emulsion Copolymerization of Butadiene and Styrene Using Potassium Persulfate as Catalyst. III. Calculation of Molecular Weights and Intrinsic Viscosities of Polymers from Mercaptan Consumption Data, W. E. Harris and I. M. Kolthoff, 72
Mercaptans as Promoters and Modifiers in Emulsion Copolymerization of Butadiene and Styrene Using Potassium Persulfate as Catalyst. IV. Definition and Calculation of Modifier Efficiency, W. E. Harris and I. M. Kolthoff, 82
Polythene Fine Structure, W. M. D. Bryant, 547
Precipitating Power as a Function of Molecular Weight, A. Dobry, 623
Recent Ultracentrifugal Investigations on Cellulose and Cellulose Derivatives, I. Jullander, 329

Naturally Occurring Polymers

Advances in Pectin Chemistry, R. Speiser, 281
Atomic Configuration of Cellulose, A. J. A. van der Wyk and K. H. Meyer, 583
Molecular Structure of Cellulose and Starch, Eugene Pacsu, 565
Polyisoprenes: A Theory of the Formation of Terpenes and Related Compounds, Arthur V. Tobolsky, L. Castro, S. J. Stein, and A. Sacher, 246
Solubility, Diffusion, and Permeation of Gases in Gutta-percha, G. J. van Amerongen, 381
Tensile Strengths of Pure Gum Natural Rubber Compounds, G. Gee, 451
X-Ray and Moisture Equilibrium Investigation of Sodium Pectate, K. J. Palmer, T. M. Shaw, and M. Ballantyne, 318

Photochemistry

Photochemistry of Proteins. I. *Letter to the Editors*, A. D. McLaren, 107
Photochemistry of Proteins. II. *Letter to the Editors*, A. D. McLaren, 447
Photolysis of Rubber, L. Bateman, 1
Some Structural and Chemical Aspects of Aging and Degradation of Vinyl and Diene Polymers, R. B. Mesrobian and A. V. Tobolsky, 463

Physical Properties

Advances in Pectin Chemistry. Part I, R. Speiser, 281
Course of Acetylation and Deactylation Reactions of Cellulose Fibers. I. Optical and Swelling Properties, D. Vermaas and P. H. Hermans, 397
Deformation Mechanism of Cellulose Gels. III. Changes in Orientation upon Drying, P. H. Hermans, J. J. Hermans, D. Vermaas, and A. Weidinger, 632
Diffusion of Water into a Polymer, J. F. H. Custers, 301
Diffusion of Water Vapor through High Polymeric Membranes, A. E. Korvezee and E. A. J. Mol, 371. *Errata*, 487
Heat Conduction and Molecular Structure in Rubberlike Polymers, J. Rehner, Jr., 263
Molecular Structure of Cellulose and Starch, Eugene Pacsu, 565
Polyelectrolytes. I. Picrates of 4-Vinylpyridine-Styrene Copolymers, R. M. Fuoss and G. I. Cathers, 12
Polymeric Amides from Diamines and Dibasic Acids, D. D. Coffman, G. J. Berchet, W. R. Peterson, and E. W. Spanagel, 306

Polythene Fine Structure, W. M. D. Bryant, 547
Refractometric Determination of Second-Order Transition in Polyvinyl Acetate, R. H. Wiley, 10
X-Ray and Moisture Equilibrium Investigation of Sodium Pectate, K. J. Palmer, T. M. Shaw, and M. Ballantyne, 318

Plasticization

Application of a Mechanistic Theory of Solvent Action to Plasticizers and Plasticization, A. K. Doolittle, 121
Creep Behavior of Plasticized Vinylite VYNW, W. Aiken, T. Alfrey, Jr., A. Janssen, and H. Mark, 178
Effect of Plasticizers on Second-Order Transition Points of High Polymers, R. F. Boyer and R. S. Spencer, 157
Internal Plasticization: The Effect of Chemical Structure, V. L. Simril, 142
Survey of Plasticizers for Vinyl Resins, M. C. Reed, 115

Polymerization (see also *Copolymerization* and *Emulsion Polymerization*)

Chain Structure of Vinyl and Diene Polymers in Relation to Polymerization Mechanism, P. J. Flory, 36
Effect of Silver Salts on Emulsion Polymerization Systems Containing Butadiene, L. W. Rainard, 16
A Magnetic Rotation Study of Polymerization of Styrene, P. A. Giguère, 296
Polymeric Amides from Diamines and Dibasic Acids, D. D. Coffman, G. J. Berchet, W. R. Peterson, and E. W. Spanagel, 306
Products of Initiation, Retardation, Inhibition of Peroxide-Induced Polymerization of Styrene, Saul G. Cohen, 511
Some Structural and Chemical Aspects of Aging and Degradation of Vinyl and Diene Polymers, R. B. Mesrobian, and A. V. Tobolsky, 463

Proteins

Photochemistry of Proteins. I. *Letter to the Editors*, A. D. McLaren, 107
Photochemistry of Proteins. II. *Letter to the Editors*, A. D. McLaren, 447

Reactions of Polymers

Course of Acetylation and Deacetylation Reactions of Cellulose Fibers. I. Optical and Swelling Properties, D. Vermaas and P. H. Hermans, 397
Course of Acetylation and Deacetylation Reactions of Cellulose Fibers. II. X-Ray Diagrams, D. Vermaas, P. H. Hermans, and A. Weidinger, 406
Photolysis of Rubber, L. Bateman, 1
Polyisoprenes: A Theory of the Formation of Terpenes and Related Compounds, A. V. Tobolsky, L. Castro, S. J. Stein, and A. Sacher, 246
Reaction of Tetrachlorophthalic Anhydride with Cellulose Derivatives, W. P. Utermohlen, Jr., and E. L. Wallace, 275
Some Structural and Chemical Aspects of Aging and Degradation of Vinyl and Diene Polymers, Robert B. Mesrobian and Arthur V. Tobolsky, 463
Use of Perbenzoic Acid in Analysis of Unsaturated Compounds. II. Determination of External Double Bonds in Synthetic Rubbers, I. M. Kolthoff and T. S. Lee, 206
Use of Perbenzoic Acid in Analysis of Unsaturated Compounds. III. Result of Determinations of External Double Bonds in Synthetic Rubbers, I. M. Kolthoff, T. S. Lee, and M. A. Mairs, 220

Reviews

Advances in Protein Chemistry, Volume III, M. L. Anson and J. T. Edsall, eds., 545
